PETER MEEHAN

`https://22a.ie` · GitHub · LinkedIn

A software engineer with a penchant for frontend web technologies – I enjoy building things that delight others and enabling organisations to do the same at scale. The best way to contact me is via LinkedIn - if you're a human that has read this document, please feel free to include the word *Turnip* in your message.

Education

B.A.(Mod.), Computer Science
Trinity College Dublin, 2017, First Class Honours.

Experience

Senior Product Engineer, *Intercom*, Dublin   **Apr 2021 - Present**
Datastores, Core Technologies, Frontend Technologies.
Enabling teams to ship better product faster through ownership and operational excellence of core frontend technologies. Maintaining our core languages, frameworks, and patterns to enable product teams to fully focus on solving customer problems (removing blockers and undifferentiated work). Parachuted into product teams for domain expertise on occasion but most energised by the multiplicative impact of improving efficiency across hundreds of engineers. Directly responsible for roadmap inputs, prioritisation, justification, and outcomes.

Product Engineer, *Intercom*, Dublin   **Apr 2018 - Apr 2021**
Design Systems, Developer Infrastructure.
Built reusable components, patterns, supporting tooling, and live documentation systems to accelerate iteration and product development lifecycles. Conducted developer productivity surveys and prioritised improvements in build, test, deploy workflows. Owned end-to-end migration of internal package release system. Drove and coordinated in-place migration and consolidation of frontend overlay libraries.

Software Engineer, *PageFair*, Dublin   **May 2017 - Apr 2018**
Shipped code to billions of pageviews per month. Designed, built, and provisioned core ad-tech services. Optimised existing infrastructure for cost savings and fault tolerance.

SEO

Comfortable in a *nix shell, big fan of hygienic version control.
Recent professional experience with: Typescript, Javascript, HTML, CSS, Tailwind CSS, Ember.js, React, build&runtime performance analysis&optimisation.
Rusty professional experience with: Rails, Ruby, Phoenix, Elixir, Scala, AWS.
